

HOW TO FOLD A FITTED SHEET

brought to you by

1-2.

Hold the sheet out with the elastic facing you, with each of your hands inside the top corners. Bring your right hand over to your left hand

3-4.

Pull the right sheet corner over the left sheet corner so it forms a pocket.

5-6.

Rotating the sheet to the right, replace your left hand with your right hand and put your left hand in the adjacent corner pocket. You should now be holding all four corners of the sheet in your hands.

7-8.

Fold sheet in half again so that all four corners meet.

9-10.

Flip the corners in your right hand over the corners in your left hand.

11-12.

Lay the sheet down with the gathered edges facing up and fold the longer part of the curved edge in towards the center to create a straight edge.

13-14.

Fold in half lengthwise, and fold into thirds.
